Company Profile

We at Utilisoft are committed to delivering maximum value to our clients helping them succeed in a constantly changing and challenging biz world. Our fundamental company values stem from understanding that our success is tied with success of our clients.

Utilisoft provides all services needed to deliver a web design and development project that is successful. We provide Internet consultancy to inform you of your possibilities, move then on to unite the marketing strategy with the concept of the site and then finalize it by programming, scripting and implementing the web site.

Our aim is to create web sites for our clients that are consistent with their brand and communicate clear and concise, loyal to its brand personality and faithful to its tone of voice.

Headquarters: Bloemfontein
South Africa
www.utsworld.net

History: Founded in 2001, Utilisoft is a privately-held company

Core Competence

- Design and development of internet systems based on content management system (PHP) and MySql Database.
- Concept and development of web based software, including shopping cart, E-commerce and online booking systems which can be integrated with a point of sale (POS) system.
- Search engine friendly development, optimized for major search engines such as Google, Yahoo and Bing.
- Long term SEO-plans for top ranking in search engines.
- Domain registration, server database setup and Hosting.

Support

We are able to provide support starting at the analysis of your specific situation, to the technical and conceptual solution of your requirements. We also provide the training after a project is delivered to show your employees how to use the content management system if needed.

Our Strengths

One-stop Internet Solutions Vendor

Whether you need an appealing website design or complex internet system development or custom programming using latest technologies and industry trends (e.g. Web 2.0) – **Utilisoft** has required experience and expertise to do it all.

Experience and Expertise

Having over 12 years of experience in providing internet services and solutions and having completed projects in different domains, Utilisoft has built a large database of knowledge that enables us to deliver the “right” solutions that address the needs of clients.

Understand Clients Needs

We carefully study each customer particular case to understand the client’s needs and objectives and deliver a dependable solution. We make you aware of all available options and provide you with a competent advice enabling you to take an informed business decision.

Maintenance and Support

Web applications and websites require maintenance and support as your needs change and grow. Inflexion provides maintenance and support services freeing you from maintaining expensive in-house support staff. We partner with our clients to help their online business running smoothly and error-free.
